

## Save Big Money on Energy Costs with LED Street Lighting from CRU Solutions

Our LED Street Light Conversion Program allows your municipality to immediately start benefitting from energy cost savings as well as improving your conservation and demand management efforts

### LED Street Light Conversion Program:

- Large energy savings from your street light hydro bill (50% or more)
- Brighter and cleaner street light illumination
- Project management and professional installation
- Maintenance included for 10 years
- Full line of street light fixtures to choose from
- Quick pay back of project investment
- Reduced street light pollution for municipality
- One stop LED conversion program including financing
- 20 year photocell warranty
- Emergency response
- Data collection and reporting
- Rewiring of existing street light when applicable

Our LED conversion program is a sustainable solution which includes 100% recycling of all original street light components and further enforces our commitment to a green business environment

Through CRU Solutions, ERTH Holdings Inc. offers tailored turnkey and full range of services to customers to meet all needs for signalized intersection or roadway illumination projects
