Technology Partners

NorthStar Utilities Solutions (Utility Customer Information Systems - CIS)

For over 30 years, NorthStar has been developing efficient, productive and cost-effective software applications for the municipal utility billing sector. Working closely with industry leaders, the design specialists at NorthStar execute software that offers continuous product development for both the administration and operational aspects of the utility industry.
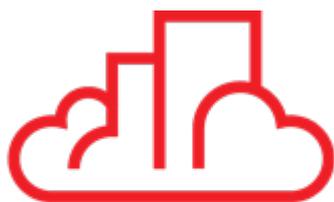

Loris Technologies Inc. (Document Management)

Loris Technologies is a leading innovator in the development of document management solutions. With customers across North America, they provide document management, workflow and archival needs in eBilling, customer service, finance, purchasing, engineering, HR/payroll, and much more. Loris' FileNexus Document Management System gives organizations the ability to capture virtually any type of document from any source, index and compress them for secure archival and future recall providing a single cohesive repository for all document management, workflow, archival and business continuity needs.

KEY2ACT (Job Cost and Service Management)

KEY2ACT

KEY2ACT provides field service, construction management and IoT asset intelligence solutions. We empower specialty trades

businesses to deliver proactive service, increase profitability and improve building performance. We believe organizations that embrace the power of technology and data analytics will outpace their competition.

Latitude Technologies (EDI Solutions)

Latitude Technologies

Latitude Technologies is a leading provider of technology services to the energy industry. Since its inception in 1997, Latitude has been instrumental in developing and implementing Internet and EDI services that meet the needs of the energy marketplace and comport with the requirements of the North American Energy Standards Board (NAESB) and the Federal Energy Regulatory Commission (FERC). Latitude's President, Leigh Spangler, sits on NAESB's Board of Directors, the NAESB Wholesale Gas Quadrant Executive Committee, and Chairs NAESB's Electronic Delivery Mechanism Subcommittee. Latitude's wholesale and retail EDI Services are currently being used by customers in 17 states.

Recoverity (Collection Services)

Recoverity

Recoverity helps businesses in the energy sector recover more of their unpaid receivables with the correct collection solution. Our smart platform confidentially compares debt collectors based on each businesses individual requirements,

at no cost. Recoverity offers rate breakdowns, recovery rate verification, functionality assessments, and a suite of compliance verification services with customer/debtor experience scoring.
